VIII SEMESTER FULL SEMESTER INTERNSHIP (FSI) (2023-2024)

BATCH NO: 12

DATE: 21-03-2024

TITLE: Collaborative learning platform

ABSTRACT

Our collaborative learning platform provides a dynamic online environment where learners can engage, interact, and co-create knowledge. Through a user-friendly interface, individuals from diverse backgrounds and expertise levels come together to share ideas, discuss topics, and work collaboratively on projects. The platform fosters active participation, encourages peer-to-peer learning, and facilitates the exchange of insights through various multimedia tools such as discussion forums, live chats, video conferencing, and shared document editing. With customizable features and robust support for group activities, our platform empowers learners to collaborate effectively, enhance their understanding, and collectively achieve their learning goals.
